DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121:

Claims 1-30 are directed to a recombinant nucleic acid molecules comprising a promoter operably linked to a heterologous polynucleotide, where the nucleotide sequence comprises SEQ ID NO: 1-4, to host cells transfected with these nucleic acids, where the host cell is a plant, to transgenic plants comprising these nucleic acids, where the plant is a monocot or dicot, and to a method of expressing a heterologous polynucleotide in a plant by providing an expression cassette comprising providing the promoter of the nucleic acid sequences operably linked to heterologous polynucleotide.

Applicants are reminded that different nucleotide sequences are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute **independent and distinct** inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq.

Applicant is required to elect a single nucleic acid of SEQ ID NO: 1, 2, 3, or 4. This requirement is not to be construed as a requirement for an election of species, since each nucleotide sequence is not a member of single genus of invention, but constitutes an independent and patentably distinct invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Georgia L. Helmer whose telephone number is 571-272-0796. The examiner can normally be reached on 8:30 - 5:00.
